### КОДОБРАЗОВАНИЕ

Пример условного обозначения:

**Блокиратор обратного хода**

Редуктор может поставляться с блокиратором обратного хода на входном валу. Это устройство обеспечивает вращение выходного вала только в одном направлении. В зависимости от размера, блокиратор обратного хода может быть размещен на фланце входного вала или же на двигателе, такого же размера. В заказе необходимо указать требуемое направление вращения вала. Координаты для связи находятся на сайте [www://reduktor-innovari.ru/](http://reduktor-innovari.ru/).
